

Lenox Public Schools 2009-2010 Bus Routes

Please review the schedule carefully and please note that these are estimated times and will be adjusted over the first ten days of school. Please be patient during this adjustment period. Students should be at their bus stop five minutes before listed pick up times.

The school buses used by the Lenox Public Schools are provided under contract. The school system administers the service. The contractor, buses, and drivers must meet safety and reliability standards established by both the Commonwealth of Massachusetts and the Lenox Public Schools. All drivers must hold a Massachusetts Department of Public Utilities Driver's License and must pass a special school bus driver's test. All drivers must have an excellent driving record when they are hired and must maintain that record on the job. Drivers must know first aid, defensive driving, emergency procedures and must possess a host of other special skills. Also, drivers must regularly pass a physical exam and attend periodic safety meetings. All buses are inspected daily and maintained scrupulously by the contractor. The Commonwealth of Massachusetts conducts bi-monthly inspections of each vehicle.

The elementary and middle/school high school routes are described below. Only children specifically classified as eligible for transportation on each route shall be transported. Drivers will follow the time schedule for each route as closely as possible consistent with weather and road conditions. Students riding school buses are required to act and behave in a safe, courteous manner and to obey the school bus driver. Students who fail to do so may have their bus privileges suspended or revoked by the school principal.

Announcements will be carried by local radio and television stations whenever normal bus operations are altered due to weather or other causes.
